Programme

Early Childhood Education Programme K2 – K4

Starting at age two, the YCIS Early Childhood Education (ECE) Programme provides a well-rounded education for children through the age of five. The specially developed curriculum allows children to discover the joy of learning through a balance of play and structured activities. Our unique international educational programme nurtures each individual child's growth, and fosters their social, emotional, cognitive, physical, creative and spiritual development.

The ECE programme is enriched by our globally recognised Co-Teaching model. In every Kindergarten classroom, one Western and one Chinese teacher act as equal partners to provide all learning and care for the children in a multicultural and bilingual learning environment.

Primary Programme Years 1 – 6

The Primary Programme at YCIS Qingdao provides a high quality and global-focused education to international students in Qingdao aged 5-11. We have designed our own unique international curriculum, which fulfils the learning criteria of Lower Primary (Years 1-3) and Upper Primary (Years 4-6) of the National Curriculum for England (NCE). The Primary Programme develops a positive learning attitude in every student, fostering inquisitiveness, critical and creative thinking.

Our Co-Teaching model continues throughout the Primary Programme with one Western and one Chinese teacher working as partners in the classroom. As a result, students develop solid linguistic skills in both English and Chinese languages, as well as an open-mind and respect for both cultures.

Art and music form an integral part of our curriculum, and all Primary students take several art and music lessons a week, including the foundation of our music programme, the violin programme, for all students in Years 1-3.

Secondary Programme Year 7 - 13

Students in our Secondary Programme are immersed in a vibrant and stimulating environment for learning and social development. Our competitive academic curriculum is partnered with a wide range of Co-curricular activities, and our highly experienced and dedicated teachers and support staff contribute to the challenging, innovative, and caring learning environment. Sports teams and competitions also provide ready challenges for developing minds and bodies.

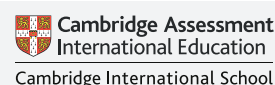

Years 7-9

The curriculum of the Lower Secondary Programme (Years 7-9) follows the National Curriculum for England's (NCE) learning objectives with some specialist adaptations, including our unique Chinese Language and Culture Programme. As a result of this course of study, students become equipped with solid organizational skills and increased self and environmental awareness. These important years fully prepare students both academically and socially for the increasing challenges of the Upper Secondary years to follow.

Years 10-11

International General Certificate of Secondary Education

In Years 10 and 11 students work towards achieving the International General Certificate of Secondary Education (IGCSE). This qualification is the most popular international certificate worldwide for this age group and is administered by Cambridge International Examinations (CIE).

Students are required to choose a combination of IGCSEs from different subject specialisms: Languages; Humanities; Sciences; Mathematics; Arts and Technology. This will hopefully result in students obtaining at least seven IGCSEs at the end of Year 11, although some pupils might complete up-to 10 depending on their capability and subject choices.

The programme caters for the different ability levels and interests of students by offering core and extended courses in most subjects. IGCSE success is achieved through different forms of summative and formative assessment including oral communications, written coursework and a final examination.

Years 12-13

International Baccalaureate Diploma Programme

The International Baccalaureate (IB) Diploma Programme is a rigorous pre-university course of study designed to meet the needs of highly motivated Secondary students between the ages of 16-18. This comprehensive two-year programme provides graduates with a qualification which satisfies the requirements of national educational systems around the world, making it the ideal qualification for international students. The International Baccalaureate Organization's (IBO) reputation for assessment also gives IB Diploma holders access to the world's leading universities and the skills required for future success.

During the two-year programme, students will follow six subject courses chosen from six subject areas. In addition, all students complete the core activities of the IB Diploma by studying Theory of Knowledge (TOK), writing an Extended Essay (EE), and participating in Creativity, Activity and Service (CAS) projects.

A Level

A Level is based on the General Certificate of Education Advanced Level Programme issued by the Cambridge Assessment International Education (CAIE) and offers various courses to choose from. English is the key medium of instruction. Students are able to decide on the most suitable courses according to their own career planning, interests and specialities. As an internationally recognised curriculum and examination, A Level assists students to become fully prepared for further studies at top overseas universities.

Our Uniqueness

Global Education in YCIS

YCIS Qingdao offers a true blend of Eastern and Western cultures, equipping children to be bilingual, globally-minded, competitive, appreciative, and caring global citizens. Students are nurtured in a multicultural environment with a fully-rounded and balanced education which transforms them into global thinking individuals.

Co-Principals and Co-Teaching Models

Two co-principals (one Western and one Chinese) and our school business manager from the School Leadership Team to provide academic and administrative vision as well as management of the school. Additionally, an equal number of fully qualified Western and Chinese teachers work in a collaborative model that enhances cultural appreciation, sharing the same responsibility for the learning and development of children in our ECE and Primary School Learning Communities. This extends into our Secondary school through the work of our Chinese Coordinator and Chinese Integrator.

English Immersion Environment

The Co-Principal and co-teaching models allows our students to truly experience international teaching styles, in a cross-cultural and immersive English learning environment through participating in a variety of learning activities. Students engage in the Yew Chung international curriculum which is based on the UK national curriculum at school, and take part in various activities that are led or guided by international teachers, such as sports teams and competitions, bands, choirs, drama contests, and more.

Character Education- Cultivating Whole-Person Development

One of YCIS's signature calling cards is its commitment to

the development of each student's moral code that will help them to make correct choices later in life. From Early Childhood to Upper Secondary, every YCIS student realises the importance of helping others in order to work towards creating a better world. These objectives of our Character Education Programme, emphasised in all daily lessons, weekly assemblies, and other activities beyond the classroom walls, are essential to the YCIS education and the creation of global citizens.

Bilingual Learning Communities

We believe that Bilingual Learning Communities (BLC) best enables students and teachers to creatively and holistically explore different fields of knowledge, while fostering individual and collaborative learning skills. These are critical for the 21st century. At YCIS Qingdao, Bilingual Learning Communities are defined as shared learning, discovery, and generation of knowledge by both students and teachers. Learning is multi-faceted and extends beyond the classroom. Teachers act as facilitators in the learning process and students are encouraged to work in groups or individually, to research and seek answers to questions. Students have the autonomy to make decisions on their learning environment and subject areas of interest to remain an active part of the learning process.

International Recognition

YCIS Qingdao is fully accredited by The Council of International Schools (CIS), and Cambridge International Examinations center (CIE). Furthermore, as an international Baccalaureate World School (IB World School), we are proud to offer the IB Diploma Programme as part of our international curriculum, with the majority of our students earning a bilingual IB diploma.
